Introduction

The City of Richmond Hill Standards and Specifications presented herein are intended as a guideline for both development and capital infrastructure projects to ensure uniformity and consistency throughout the municipality. These requirements are not intended to be exhaustive and do not relieve the practitioner of the responsibility of ensuring the completeness and quality of their design.

The City of Richmond Hill is a municipality within the Region of York. The Region also provides services that include but are not limited to transportation, transit, water, wastewater, and emergency services. In addition to the Region, there may be other stakeholders and/or agencies with their own requirements and guidelines. Practitioners are advised to also familiarize themselves with any and all guidelines and standards, as may be applicable.

All references contained herein to any standards, specifications, regulations, and guideline documents are intended to mean the latest editions or versions of those documents. Prior to commencement of any design, the practitioner shall ensure that they obtain the latest copies of all reference documents, including this manual.

Any discrepancies, conflicts, or issues with the content contained herein shall be reported to the City immediately.

Revision Information Sheet

Name of Publication: City of Richmond Hill Standards & Specifications Manual

The current and future revisions are numbered consecutively. If maintaining a hardcopy version of this electronic document, users are required to remove and replace the applicable pages in the manual to ensure that copies of the manual are always up to date.

All future updates and revisions to this manual will be posted to this page. It is the user's responsibility to check for changes to the manual and ensure that they are using the latest version.

Revision Number	Date	Comments
1	2022	Entire Manual Reissued
