

Carrville Road Watermain Re-Lining (CIPP)

Planned Work

The scope of work includes a temporary watermain by-pass, re-lining of existing watermain, disconnection and reconnection of the existing services and side street watermains and replacement of hydrants and valve chambers.

The construction is scheduled to begin in June 2024 and to be completed by fall 2024 (weather permitting).

Impact on Local Residents

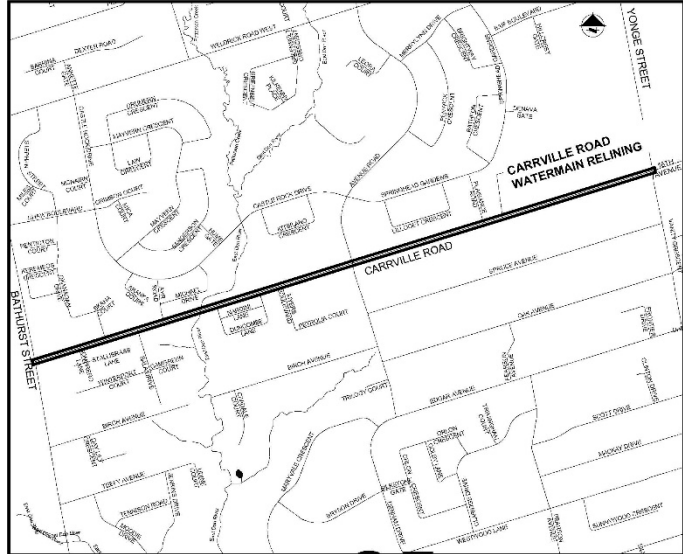

The roads will remain open to vehicular and pedestrian traffic during construction.

Temporary traffic diversions maybe required at times to allow construction to be undertaken in a safe and efficient manner. There will be brief scheduled water service disruptions for watermain construction. You will receive advanced written notification prior to the water service and driveway access disruptions.

Thank you for your patience during construction.
