

Cedar Avenue Watermain Replacement

Planned Work

The scope of work includes City watermain replacement with associated appurtenances and water services replacement on Cedar Avenue from Major Mackenzie Drive East to the Fox Run Crescent (north leg). Construction is scheduled to begin in June 2024 and to be completed in fall 2024, weather permitting.

Impact on Local Residents

Roads will remain open to vehicular and pedestrian traffic during construction. Temporary traffic diversions and driveway access restrictions will be required at times to allow construction to be undertaken in a safe and efficient manner.

There will be brief scheduled water services disruptions for the watermain construction. You will receive advanced written notification prior to the driveway access or water service disruptions.

Private gardens and underground systems (e.g. heated driveways) that are located within the City-owned boulevard or property may be impacted by the proposed construction work. The City will not be responsible for any damages to the privately-owned items that are within the City-owned boulevard or property.

Thank you for your patience during construction.
