

## Blackforest Drive, Acorn Road and Rosegarden Crescent Reconstruction

### Planned Construction Work

The scope of work includes road excavation, removal of roadside ditches and driveway culverts, new asphalt pavement, new curb and gutter, driveway re-grading and paving, new sidewalks, new storm sewer and catch basins, watermain replacement, sanitary upgrades, and streetlight improvements. The culvert crossing on Blackforest Drive west of Yonge Street will also be replaced.

### Construction Schedule

Utility relocations by the utility companies are currently on-going and are expected to be completed in June 2024 (weather dependent). Following the completion of utility relocations, the City's construction is scheduled to commence in June 2024 and is projected to be substantially completed by late 2025. The road reconstruction will be undertaken in phases as outlined below:

- June 2024 to Late 2024 – Blackforest Drive and Acorn Road Reconstruction including base asphalt paving, and sanitary sewer work on Rosegarden Crescent
- December 2024 to Spring 2025 – Winter shutdown
- Spring 2025 to Late 2025 – Rosegarden Crescent Reconstruction, top asphalt paving on all roads, and site restoration

### Impacts on Local Residents

- The roads will generally remain open to vehicular traffic during the construction. Temporary traffic diversions and driveway access restrictions will be required at times to allow construction to proceed safely and efficiently. Advanced notices will be provided for any temporary road closures and driveway access restrictions.
- There will be scheduled water and sanitary service disruptions for the watermain and sanitary sewer construction. Advanced notices will be provided prior to the water and sanitary service disruptions.

- Canada Post mailboxes on Blackforest Drive and Rosegarden Crescent will be temporarily relocated by Canada Post to nearby locations as the construction progresses to ensure safe and uninterrupted public access to the mailboxes during construction.

## Reminders

- As part of the road reconstruction, the existing roadside ditches will be filled in. All private buried drain pipes (e.g. sump pump or roof drains) that currently discharge into the existing ditches within the City's property or boulevard must be disconnected, and modified to discharge onto the lawn and drain overland within the private property by the homeowner prior to the road reconstruction. Please refer to Attachment 1 for further details on the sump pump outlet.
- Private gardens and underground systems (e.g. heated driveways) located within the City's property or boulevard may be impacted by the proposed construction work. The City will not be responsible for any damages to the privately-owned items that are within the City's property.
