

Teefy Avenue, Moodie Drive, Tennison Road, Jenkins Drive, Udine Court Reconstruction

Planned Work

As part of the City of Richmond Hill's ongoing commitment to maintaining a high quality road network, the City will be commencing the preliminary investigations for reconstruction of Teefy Avenue, Moodie Drive, Tennison Road, Jenkins Drive, and Udine Court. The scope of work may include removal and replacement of curb and gutter, new asphalt pavement, watermain replacement, sanitary and storm upgrades as required and streetlight improvements. Detailed design is scheduled to commence in 2026, pending budget approval.

Impact on Local Residents

City staff and consultants will be in your area to undertake preliminary investigations. In order to complete the topographic survey and other data collection, City representatives will need to briefly enter upon your property to locate existing features and collect elevations beyond the municipal road allowance. This action is necessary to ensure that all ground surface details are accurately identified for the design.
