

### Instructions: How to make your own paper cup

1. Take the cup and cut the bottom of your cup out, with scissors carefully.
2. Then make your party popper – cut tip off a balloon. You will only need the end of the balloon.

**TOP TIP:** Cut **ACROSS** the “fold” of the balloon”. This fold is actually a “weak point in the balloon”. If you cut it so the fold is on “either side”, it is likely that the balloon will tear along here, as you stretch it over the cup.

3. You will need to create a bottom knot of the balloon. So, time to knot the balloon as if it was filled with air. Then stretch over the bottom of your cup. Some like to stretch it over the TOP of the cup, as the rim on the cup gives you extra hold. You can tape it in place or add an elastic to secure, but we found it was fine, just the way it was.
4. Fill with Pompoms or confetti and have fun!

### Supplies needed:

- Biodegradable cups
- Scissors
- Balloons
- Elastic
- Pompoms or Confetti (various sizes)
